

Can Peracetic acid be used in the washing of chicken carcasses and parts?

The washing of chicken carcasses and parts is considered a function of processing. Thus, we refer you to the listing of Peracetic acid in §205.605(b). You will note that Peracetic acid is allowed for use in wash and/or rinse water according to FDA limitations. Accordingly, Peracetic acid mixed with water to wash chicken carcasses and parts is allowed under the NOP.
